Key Information for Investors

This document contains key information for the investors in this fund. This does not represent promotional material. The information contained in this document are prescribed by law and bylaws in order to assist the investors in understanding the nature of this fund and the risks associated with investing in it. Our advice is to read this document carefully in order to be able to make an informed decision about the potential investment.

Title and Seat of the Investment Fund and the Fund Management Company

Open-end investment fund KB Publikum – Paricen
Fund ID:
912000000165

Open-end and close-end investment funds management company
KB Publikum invest AD Skopje
Kiril i Metodij 50, Skopje, Macedonia

The fund is approved in Republic of North Macedonia and is regulated by the Security and Exchange Commission. The Fund is approved with Decision by SEC no. UP1 08-168 dated 08.03.2011. The expressed key information for the investors is accurate on 31.12.2022.

Objectives and Investment Policy

The aim of the Fund is to protect the investments from market fluctuations while at the same time to ensure high level of liquidity accompanied with continuous growth in the price of shares (providing stable return for investors). The growth of the asset value of this fund is slower, but continuous, while the value oscillations practically do not exist. The yield is usually higher than the interest on demand deposits, and customers use it mostly as a way of short-term placement of excess money (overnight).

The Company shall invest the Fund assets in the following instruments:

- **Asset Class A** (min. 20% - max. 65%) investments in short-term and long-term debt securities issued by entities from the Republic of Macedonia, Croatia, Serbia, Montenegro, Albania, Bosnia and Herzegovina, Ukraine, Russia, Kazakhstan, Brazil, India, China, the European Union, and the OECD.
Investments in fixed income securities issued by the Republic of Macedonia, EU member countries and the OECD can exceed 35% of the Fund assets;
- **Asset Class B** (min. 35% - max. 80%) investments in deposits with banks in the Republic of Macedonia with maturity of less than a year;
- **Asset Class C** (min. 0% - max. 10%) investments in open-end investment funds with the lowest level of risk, which invest exclusively in deposits and fixed income securities, provided that they do not charge management fees higher than 1% of the fund net asset value.

The income from instruments in which Fund assets are invested, such as capital gains, dividends, foreign exchange gains, and interest income, will not be distributed to the owners of shares; but they will be automatically reinvested in order to increase the price of the Fund shares. The Fund investment strategy and the financial instruments selection suggest investment in short term without pre-defined term of investment, that is, this Fund is intended for investors who want to invest their assets for a period of less than 1 year.

Risk and Success Profile

The synthetic risk indicator indicates the lowest level of risk that is characteristic for this type of funds. Fluctuations are present only due to the investments in government Eurobonds denominated in EUR, i.e. as a result of the market movements of the middle exchange rate of EUR in relation to MKD.

Low risk				High risk			
<Low proceeds				High proceeds>			
1	2	3	4	5	6	7	

The following risks may have significant impact to the proceeds:

- **Credit risk** – risk that the issuer of security, will not be able to meet its obligations, in time and/or in full;
- **Liquidity risk** – risk that the Fund will have difficulties for finding adequate amount of cash to meet its obligations arising from withdrawal of shares in the Fund as a result of inability to sell financial instruments fast at the price close to their fair value;
- **Counterparty risk** – risk that the entity with which the Company, on behalf of the Fund, concludes transactions in the financial markets, will not be able to meet its obligations, in time and/or in full.

The funds for buyout of shares are paid to the investor's transaction account upon submitted Request until 14:00 within the working day for payment the next working day. The prices for sale of new shares or buyout of the existing ones are calculated every working day until 16:00 and are published on the Company's website. The historical data used for the calculation of the synthetic indicator should not be considered as a reliable indicator of the future risk profile of the Fund. The category of risk and success profile is not a guarantee that they will remain unchanged, i.e. the categorization of the Fund may change over time. The lowest category does not mean that the investing is risk-free.

Costs

One-time costs that occur before or after your investment

Entry fee	0,0%
Exit fee	0,0%

Entry and exit fees are always expressed in the highest amount, i.e. in certain situations the investor may pay a lower amount. No entry or exit fees are anticipated in this fund.

Costs to the Fund during the year

Current fees	1,01%
---------------------	-------

Fund costs in certain special circumstances

Operating fees

None

The investor can find out the real amount of entry and exit fees from the investment advisor or investment agent. The costs borne by the investor are used to cover the costs of the day-to-day operations of the Fund, including the costs of marketing and distribution, and these costs may reduce the potential growth of the investments. More detailed information on costs, including operating fees and how they are calculated, is available in Part I) point 6 of the Fund Prospectus.

Historical Proceeds

The fund was established on May 18, 2011, with an initial price of 100 MKD per share. The minimum investment amount is 1,000 MKD. Proceeds are calculated in domestic currency. The share price is shown since inception on a net basis, after calculating all fees and expenses. The data on the realized profit in % is presented for the whole calendar year. Past returns are for informational purposes only and doesn't represent indication of the possible returns in the future. Data for all categories is expressed as % of NAV.
