Investment policy and objectives

The Company's primary objective is investing the collected capital in financial markets for the purpose of achieving adequate returns for the Fund's investors, while at the same time strictly following the imposed investment restrictions, as well as the needs for liquidity and safety of the invested assets.

The selection strategy of financial instruments, which will be a building block of Fund's portfolio, carries out medium level of risk that is higher than the risk associated with money market funds and fixed-income (bond) funds, while at the same time it is lower than the risk associated with equity funds.

Fees and expenses

The fee for issuing share documents is calculated on the amount of the payment, by using the following rates:

- Up to 100.000,00 MKD	3,5%
- From 100.001,00 MKD up to 500.000,00 MKD	3%
